

Anti-Human CD130-168Er

Catalog: 3168016B

Package Size: 100 tests

Storage: Store product at 4°C. Do not freeze.

Reactivity: Human

Clone: 2E1B02

Isotype: IgG2a

Formulation: Antibody stabilizer with 0.05% Sodium Azide

Technical Information

Validation: Each lot of conjugated antibody is quality control tested by CyTOF® analysis of stained cells using the appropriate positive and negative cell staining and/or activation controls.

Recommended Usage: The suggested use is 1 µl for up to 3 X 10⁶ live cells in 100 µl. It is recommended that the antibody be titrated for optimal performance for each of the desired applications.

Human PBMCs stained with 168Er-anti-CD130(2E1B02) and 158Gd-anti-CD33(WM53). Total viable cells are displayed in the analysis.

Description

The 2E1B02 monoclonal antibody specifically binds to CD130, a 130 kD type 1 membrane glycoprotein that belonging to the hematopoietic cytokine receptor superfamily. CD130 is also known as gp130 (glycoprotein 130), IL6ST (Interleukin-6 signal transducer), and IL6RB/IL-6Rβ (Interleukin-6 Receptor beta). CD130 is a subunit associated with the receptors for a variety of cytokines including IL-6, IL-11, Oncostatin M (OSM), CNTF (ciliary neurotrophic factor), CT-1, Neuropeptin (NP), and IL-27. CD130 is widely expressed on a variety hematopoietic cell types including T cells, activated B cells, monocytes, plasma cells, and is also expressed on endothelia.
