

Anti-Human CD223/LAG-3-175Lu

Catalog: 3175033B

Package size: 100 tests

Storage: Store product at 4 °C. Do not freeze.

Clone: 11C3C65

Isotype: Mouse IgG1

Formulation: Antibody stabilizer with 0.05% sodium azide

Technical Information

Validation: Each lot of conjugated antibody is quality control-tested by CyTOF[®] analysis of stained cells using the appropriate positive and negative cell staining and/or activation controls.

Recommended usage: The suggested use is 1 µL for up to 3×10^6 live cells in 100 µL. It is recommended that the antibody be titrated for optimal performance for each of the desired applications.

Human PBMCs were incubated for 3 days in media alone (left) or with PHA (right) and then stained with ¹⁴⁶Nd-anti-CD8 (RPA-T8) and ¹⁷⁵Lu-anti-CD223/LAG-3 (11C3C65). CD3+ T cells are displayed in the analysis.

Description

Lymphocyte-activation gene 3 (LAG-3), also known as CD223, is a 70 kDa surface glycoprotein belonging to the Ig superfamily. LAG-3 shares homology with CD4, and LAG-3 binding to MHC class II is thought to contribute to the negative regulation of T cell activation. LAG-3 is expressed on T cells, including regulatory T cells and NK cells. Recently, it has been suggested that co-expression of CD49b and LAG-3 identifies human and mouse type 1 regulatory T (Tr1) cells.
