

Anti-Human CD278/ICOS-151Eu

Catalog #: 3151008B

Package Size: 28 tests

Storage: Store product at 4°C. Do not freeze.

Cross Reactivity: Human

Clone: DX29

Isotype: Mouse IgG1

Formulation: Antibody stabilizer with 0.05% Sodium Azide

Technical Information

Validation: Each lot of conjugated antibody is quality control tested by CyTOF[®] analysis of stained cells using the appropriate positive and negative cell staining and/or activation controls.

Recommended Usage: The suggested use is 1 µl for up to 3 X 10⁶ live cells in 100 µl. It is recommended that the antibody be titrated for optimal performance for each of the desired applications.

Human PBMCs were incubated for 3 days in media alone (left) or with PHA (right) and then stained with 170Er-anti-CD3 (UCHT1) and 151Eu-anti-CD278 (DX29). CD45⁺CD33⁻ cells are displayed in the analysis.

Description

CD278, also known as ICOS, is a 50-60 kDa homodimeric membrane glycoprotein and a member of the CD28 family reacting with inducible costimulatory (ICOS) molecule. It is highly expressed on activated T cells. It is the receptor for B7 related protein 1 (B7RP-1) and also, like CD28, ICOS is costimulatory signal for T cell activation, proliferation and cytokine production. It is not expressed on resting or activated B cells, monocytes, NK cells, granulocytes, dendritic cells or platelets. Unlike the constitutively expressed CD28, ICOS expression is de novo. It has been suggested that ICOS may play an important role in IL-10 production. In presence IL-10, purified recombinant human ICOS significantly increased in vitro B cell growth stimulated by pokeweed mitogen (PWM) and enhanced production of IgG.
