

Anti-Human TNF α -152Sm

Catalog #: 3152002B

Package Size: 100 tests

Storage: Store product at 4°C. Do not freeze.

Cross Reactivity: Human

Clone: MAb11

Isotype: Mouse IgG1

Formulation: Antibody stabilizer with 0.05% Sodium Azide

Technical Information

Validation: Each lot of conjugated antibody is quality control tested by CyTOF[®] analysis of stained cells using the appropriate positive and negative cell staining and/or activation controls.

Recommended Usage: The suggested use is 1 μ l for up to 3 X 10⁶ live cells in 100 μ l. It is recommended that the antibody be titrated for optimal performance for each of the desired applications.

Human PBMCs were incubated for 6 hours in media alone (left) or with PMA and ionomycin (right) in the presence of monensin and brefeldin A. Cells were then fixed, permeabilized, and stained with 170Er-anti-CD3 (UCHT1) and 152Sm-anti-TNF α (MAb11).

Description

Tumor Necrosis Factor (TNF) alpha, also known as cachexin, is a cytokine with a primary role of regulation of immune cells. It plays a role in the acute inflammatory response to infections and has cytolytic activity against tumor cells. It is produced primarily by activated macrophages but is also other cells such as activated monocytes and T cells.
