

# Anti-Mouse CD140b-151Eu

Catalog: 3151017B

Package Size: 100 tests

Storage: Store product at 4°C. Do not freeze.

Reactivity: Mouse

Clone: APB5

Isotype: Rat IgG2a

Formulation: Antibody stabilizer with 0.05% Sodium Azide

## Technical Information

**Validation:** Each lot of conjugated antibody is quality control tested by CyTOF<sup>®</sup> analysis of stained cells using the appropriate positive and negative cell staining and/or activation controls.

**Recommended Usage:** The suggested use is 1 µl for up to 3 X 10<sup>6</sup> live cells in 100 µl. It is recommended that the antibody be titrated for optimal performance for each of the desired applications.

Mouse NIH/3T3 fibroblast cell (top) and mouse EL4 T cells (bottom) stained with 151Eu-anti-CD140b (APB5). Total viable cells are displayed in the analysis.

## Description

CD140b, also known as platelet-derived growth factor receptor β (PDGFR-β), is a cell surface tyrosine kinase receptor for members of the platelet-derived growth factor family. CD140b forms homodimers or heterodimers on the surface upon ligand binding and phosphorylates substrates. CD140b is expressed on embryonic tissues and mesenchymal-derived cells adult mice. CD140b plays an essential role in the regulation of embryonic development, cell proliferation, survival, differentiation, chemotaxis, and migration.
